

QUALITY POLICY

The philosophy of the Aesthetic Day Surgery is to provide patients with the highest level of care, effective treatment and sound management. The fundamental philosophy of the Centre is grounded in the belief that each individual is worthy of respect.

The Centre undertakes a core commitment to quality and risk management through the implementation of a Quality Management System in accordance with ISO 9001:2015. This commitment underpins all aspects of our business and operational planning which ensures that only the highest standard of patient care is given by our staff to meet the needs and expectations of our patients and customers.

Our Management System also incorporates compliance with all current statutory regulations including NSQHS Standards, Environmental Management, and Work Health and Safety.

It is the prime objective of the Centre to provide quality health care including a safe, skilled, caring and supportive environment which safeguards the confidentiality and rights of our patients and their families.

Aesthetic Day Surgery strives to identify, understand and manage continual quality improvement to benefit the provision of healthcare to our patients. As we are a customer focused organisation, we aim to meet the requirements and expectations of our customers.

We continually monitor our performance against our quality objectives.
